Activity: AWARENESS PROGRAM ON CASHLESS INDIA

Participants: 20

Date of Activity: 3 Dec., 2021

Place: Diamond College of commerce and science

Report: Awareness program on cashless India was organized at Diamond College of commerce and science

Government of India has taken a slew of measures to promote cashless economy. Our Nation has to go through a lot of transitions in achieving the same. It is not easy for sure, but at the same time it is not impossible. Based on the international studies, right set of tool and technologically along with educating society are the two key enablers for a same. India being world's fastest growing major economy and also riding high on the digital revolution, has less technological holdback in adopting the cashless ways of doing business. In spite of widespread availability of tools and technology the adoption is less, which can be enhanced by incentivizing society and systematic education/training of masses regarding the short-term and long term benefits.

IT industry can play a vital role in the National Movement of transforming the country to adopt a cashless economy, through extensive training and awareness sessions.

Role of IT Industry in Cashless Economy:

IT Park has a good HR practice and has enthusiastic and motivational trainers who can be catalyst in achieving this transformation. IT Park must ensure 100% cashless transaction for their operations and also encourage their employees to adopt cashless transaction not only in purchase of large amount household utilities but also the articles related to daily needs like grocery, medicines, etc.
